

EXCELLAY™ Nine Pro-Tred™ Carpet Cushion

Special Applications

Pro-Tred™ Excellay™ range of products are a specially formulated high density carpet cushion for conventional lay applications where thicker options may not be appropriate, double bond solutions not wanted, but comfort and support is desired. Suitable for numerous Domestic & Commercial situations where:

- Deep impressions of the carpet are not desired because of the occasional point load use.
- The total carpeting height has to be reduced because of door positions and connections to tiled areas etc.

Pro-Tred™ Excellay™ is protected with MicroFresh™ which inhibits the growth of mould, mildew, bacteria and dustmites; is certified to NZ's recognised standard for Soft Underlays AS4288:2003, and Carpet Rug Institute's Green label for low VOCs.

For more information on suitability contact your Dunlop Flooring approved retailer or visit: www.excellay.co.nz
